

ARIVALAGAN SANKAR

REACT FRONTEND DEVELOPER

Chennai, Tamil Nadu, India | arivalagansankar.dev@gmail.com | +91-8220151020

LinkedIn | GitHub

PROFESSIONAL SUMMARY

React Frontend Engineer with 1.7+ years of experience delivering production-ready web applications using React, Remix, TypeScript, and modern frontend technologies, with working knowledge of Node.js, Express.js, MongoDB, and REST APIs. Specialized in scalable component architecture, responsive UI engineering, accessibility, performance optimization, and user-centric experiences across SaaS, Fintech, Education, Hospitality, and enterprise client projects. Experienced in Agile/Scrum development, collaborating with cross-functional teams to build high-quality, maintainable, and scalable applications following modern frontend engineering best practices.

EXPERIENCES

React Frontend Developer

Round Logics

June 2025 - Present

CHENNAI, INDIA

- Developed scalable and responsive frontend features for multiple live SaaS applications using React.js, TypeScript, Redux Toolkit, Remix, SCSS, Tailwind CSS, shadcn/ui, and GSAP, translating complex Figma and Adobe XD designs into pixel-perfect, accessible, and production-ready user interfaces.
- Implemented Redux Toolkit state management, reusable component-driven architecture, custom hooks, authentication workflows, and REST API integrations while ensuring browser compatibility and WCAG accessibility standards.
- Optimized application performance through Core Web Vitals improvements, code splitting, lazy loading, semantic HTML, SEO-friendly structures, and responsive design best practices across Development, UAT, and Production environments.
- Collaborated with design, QA, and backend teams in Agile/Scrum environments, participating in Git workflows, code reviews, Postman API validation, manual testing, and CI/CD deployment pipelines using GitHub Actions.

Full-Stack Developer Intern

Round Logics

Dec 2024 - June 2025

CHENNAI, INDIA

- Collaborated with Team Lead, designers, and developers to coordinate project requirements, participate in sprint planning, manage feature workflows, and ensure timely delivery across Fintech, Betting, E-commerce, and SaaS client applications.
- Built responsive, component-driven UIs and landing pages using HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Tailwind CSS, GSAP, and ScrollTrigger, translating complex Figma designs into pixel-perfect, accessible, and mobile-friendly interfaces with advanced motion and parallax effects.
- Developed backend REST APIs using Node.js, Express.js, and MongoDB, implementing JWT authentication, CRUD operations, secure data handling, and frontend-backend integrations.
- Worked across the complete software development lifecycle, including requirement analysis, Figma handoff, API integration (Fetch/Axios), state management, Postman testing, Git PR reviews, and deployments using Vercel and Render, while focusing on performance optimization, responsive design, and delivering production-ready, user-centric features within tight deadlines.

PROJECTS

Maanasa Temple Arch(Live Jul-2026) — Temple Architecture & Construction Company Website

Skills Used: React.js, Remix, TypeScript, SCSS Modules, Adobe Photoshop, Responsive Design

GitHub | Live Demo

- Developed and enhanced the Home page using React, Remix, TypeScript, and SCSS Modules by building reusable Hero, Global Presence, and Footer components with modular, data-driven architecture, responsive layouts, accessibility improvements, optimized SVG/WebP asset integration, and consistent branding across desktop, tablet, and mobile devices.
- Designed custom pixel-perfect vector-style architectural skyline illustrations in Adobe Photoshop and implemented a modern, responsive Footer with premium branding and user-centric UI/UX, while collaborating in an Agile/Scrum environment through sprint-based development, Git feature branches, pull requests, and peer code reviews.

The Aussie House (Live Client Project 2026) — Luxury Beach Homestay Platform

Skills Used: Remix, React.js, TypeScript, SCSS, Responsive Design, Performance Optimization, Lazy Loading, Core Web Vitals

GitHub | Live Demo

- Developed and redesigned production-ready Gallery, Homepage, & Footer experiences for an Australian-themed luxury beach homestay platform, implementing hero video sections, responsive gallery grids, lightbox navigation, custom SVG, video experience modals, premium UI/UX interactions, & fully responsive layouts using Remix, React.js, TypeScript, and SCSS Modules.

- Optimized media delivery using lazy loading, async, WebP optimization, GPU compositing, CLS prevention, SEO, accessibility. Reduced gallery payload from 14.76 MB to 5 MB (66%) & hero video from 11.34 MB to 2.11 MB (81%), enabling smooth rendering of 57 optimized assets. Improved Core Web Vitals, scrolling performance, and cross-device user experience.

NemSchools Web UI (Live Client Project 2026) — *Educational Technology Platform*
Skills Used: Remix SSR, React.js, TypeScript, Strapi CMS, REST APIs, Nodemailer, SCSS Modules

GitHub | Live Demo

- Developed and enhanced production-grade Admission, Gallery, News, Career, Contact, and Footer modules using Remix SSR, React.js, TypeScript, Strapi CMS, and REST APIs, implementing dynamic forms, reusable components, SEO-friendly interfaces, and client-specific feature enhancements.
- Engineered responsive, performance-focused user experiences through server-side rendering, multi-environment configurations (Development, UAT, Production), SMTP-based form workflows, accessibility improvements, lazy loading, dynamic routing, and cross-device compatibility optimization.

Gaming BetWallet Dashboard (2026) — *Fintech Gateway*
Skills Used: HTML5, CSS3, jQuery, Responsive Design, Mobile-First Design, Fintech UI/UX

GitHub | Live Demo

- Engineered a responsive fintech deposit dashboard supporting UPI, wallets, debit/credit cards, net banking, and bank transfer workflows while delivering high-conversion payment experiences through mobile-first design, intuitive navigation, promotional interfaces, and modern UI/UX patterns.

Client Hub – CRM SaaS (2025) — *SaaS Product*
Skills Used: HTML5, CSS3, JavaScript (ES6+), Responsive Design, LocalStorage API, SaaS UI/UX

GitHub | Live Demo

- Developed a responsive SaaS-based CRM platform featuring client onboarding, relationship management, sales workflows, meeting scheduling, and support tracking through modular JavaScript architecture and mobile-first UI design.
- Implemented browser-based CRUD operations, local data persistence, accessibility-compliant modal systems, secure data handling, and responsive dual-pane dashboards optimized for cross-device experiences.

Login & Registration System (2025) — *Authentication App*
Skills Used: MERN Stack, JWT Authentication, MongoDB, Node.js, Express.js, React Router

GitHub | Live Demo

- Developed a full-stack MERN authentication system featuring secure user registration, JWT-based authentication, protected routes, password encryption using bcrypt, and MongoDB Atlas integration.
- Implemented REST APIs, Auth Context state management, responsive user dashboards, middleware-based authorization, and cloud deployment using Vercel and Render.

EDUCATION	
Bharathiar University (Sri Krishna Arts and Science College - Autonomous) <i>MSW, HR & Psychology CGPA: 7.20</i>	Coimbatore, TN Jun 2021 – Aug 2023
Bharathiar University (NGM College - Autonomous) <i>B.A. Economics CGPA: 7.00</i>	Pollachi, TN Jun 2018 - May 2021

TECHNICAL SKILLS			
Frontend & Frameworks	Backend & Database	UI/UX & Design	Tools & DevOps
• React.js • JavaScript (ES6+) • TypeScript • Redux Toolkit • React Router • Remix SSR • SCSS Modules • Tailwind CSS • shadcn/ui • GSAP & ScrollTrigger	• Node.js • Express.js • MongoDB • Mongoose • REST APIs • JWT Authentication • Strapi (Headless CMS) • Axios	• Figma • Wireframing & Prototyping • User Flow Design • Interaction Design • Information Architecture • Design Systems • Visual Hierarchy • Typography	• Git & GitHub • GitHub Actions (CI/CD) • Postman • Jira • Vite • PM2 • Environment Configuration • Vercel & Render • Core Web Vitals • WCAG Accessibility • SEO Optimization • SEO-Friendly URLs • Browser Compatibility • Agile/Scrum
